Hierarchical learning
Professional reputation and accountability
Fitting in the team
Local prescribing norms
Monitoring and Evaluation
Do antimicrobial prescribing interventions for doctors-in-training...
1
...make AMR **everyone's** business?
2
...specify what trainees at different levels of training are **responsible** for?
3
...clarify **knowledge**, **skills** and **capabilities** needed to fulfill these responsibilities?
4
...provide clear processes for seeking **advice** and support?
5
...ensure changes are endorsed and reinforced by **seniors** in the workplace?
6
...enable adequate **trust** so clinicians will ask questions and challenge?
