

Chief Investigator : Dr David Miller, University of Leeds LS2 9JT

Are you undergoing fertility treatment?

If you are going to be treated using Intra – Cytoplasmic Sperm Injection (ICSI) you may be suitable to take part in a new clinical trial:

HABSelect

Hyaluronic Acid Binding Sperm selection Study

MAIN OBJECTIVE: to assess if we can improve the live birth rate for couples having ICSI treatment by changing the way sperm is selected prior to injection.

For more information, please visit the study website www.HABSelect.org.uk or contact the research nurse in this fertility centre on **INSERT NUMBER HERE** OR

.....,

Email the HABSelect Trial Coordinator - Ms Karolina Witt - HABSelect@qmul.ac.uk

This study has been approved by Sheffield NRES Committee (Study reference number 13/YH/0162)
