

3D End of trial clinician questionnaire

GP practice:

Role:

ID:

Date:

1. The 3D model included the following components. Will you continue to use any of them?

Component	Yes	No	Maybe	Please state reason or if already part of usual care at your practice
Asking patients about their priorities and most important concern				
Focus on quality of life (e.g. pain, mobility, function)				
Using a formal depression screening tool e.g. PHQ9, for patients with multimorbidity				
Annual pharmacist review				
Enquiring about medication adherence				
Agreeing patient and clinician actions in a health plan				
Allocating extra time to patients with multimorbidity				
Comprehensive review of all health problems at once				
Six monthly review				
Two part review: nurse appointment to gather information then GP appointment to make a plan				
Personal continuity - trying to ensure patients with multimorbidity see same GP for every appointment				

2. Please answer the following questions

	Yes	No	Maybe	Reason or comments
Will you continue to use the 3D template?				
Do you think most of your patients understood the purpose of the 3D reviews?				
Were 3D patients continuing to attend other long-term condition reviews during the study?				
Has taking part in 3D changed your clinical practice in any way?				

Please continue on reverse

End of trial clinician questionnaire

GP practice:

Date:

3. To what extent do you agree with the following statements?

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
It was easy to implement the 3D approach during the trial					
It was easy to fit in the 3D reviews					
The template worked well for me					
The study targeted the right group of patients					
The 3D reviews benefitted patients					
Patients liked 3D reviews					
The 3D approach was trying to offer the sort of care I would ideally like to provide					
The financial incentive for doing 3D reviews was an important factor in motivating us to complete them					
The practice champion role was important for helping implement 3D					
The monthly feedback searches were helpful to keep us on target					
The training at the beginning was sufficient to implement 3D properly					
Because the researchers kept in touch we did more reviews than we would have done					

Thanks very much for your feedback and for taking part in 3D.

Please return the questionnaire to <3D study researcher> using the Freepost envelope:
