3D training course Part B

The 3D Study:
Improving whole person care

Date:

Your role *(please circle __all__ that are relevant to you)*   **Name** (optional): collated

Practice manager	Admin/ recep/IT	Sessional/ Locum GP	Salaried GP	GP Partner	Newly qualified GP (first 3 years)	Nurse practitioner	Practice nurse

Learning objectives Please rate how well these were met	Poor 1	Fair 2	Good 3	Excellent 5
1. Be familiar with the use of the 3D template				
2. Consider issues around medication adherence and how best to discuss them with patients				
3. Using the case study, consider how best to create a care plan for a patient with multi-morbidity				
4. Appreciate the next steps in implementation of 3D				

Please rate the following statements	Strongly Disagree	Disagree	Agree	Strongly Agree
The training will benefit my personal practice				
The programme materials were helpful				
I think that the practice will be able to implement 3D				
I think people with multi-morbidity in this practice will benefit from 3D				
I think I have the skills to implement the 3D approach				
I feel confident about using the 3D template				

Your comments:

What went well today, and why?

Please turn over page

What went less well today, and why?

My main concern about implementing 3D is…..

What element of 3D do you think is least important and why?

What element of 3D do you think is most important and why?

Any other comments:

Thank you
