

Additional figures and tables for chapter 7

<b>Indicator metadata</b>		
<b>Local Authority indicators</b>		
<b>Population</b>		
<i>Indicator reference</i>	<i>Indicator title</i>	<i>Data presented</i>
CGA1	Local Authority population of people aged 75 years and over by age and sex	Number and proportion of residents aged 75 years and over in each age category (75-79, 80-84, 85-89, 90+) by sex, with England comparators
CGA2	Local Authority population of people aged 75 years and over by deprivation	Number and proportion of residents aged 75 years and over in each deprivation category defined by national quintiles of the Index of Multiple Deprivation (IMD) of residential area, with England comparators
<b>Hospital activity</b>		
<i>Indicator reference</i>	<i>Indicator title</i>	<i>Data presented</i>
CGA3	A&E attendances by people aged 75 years and over from the Local Authority population	Total number of A&E attendances; crude and standardised rate per 1,000 resident population aged 75 years or older
CGA4	Outpatient attendances by people aged 75 years and over from the Local Authority population	Total number of outpatient attendances; crude and standardised rate per 1,000 resident population aged 75 years or older
CGA5	Emergency admissions for people aged 75 years and over from the Local Authority population	Total number of emergency (non-elective) hospital admissions; crude and standardised rate per 1,000 resident population aged 75 years or older

CGA6	Planned admissions for people aged 75 years and over from the Local Authority population	Total number of planned (elective) hospital admissions; crude and standardised rate per 1,000 resident population aged 75 years or older
CGA7	In-hospital bed usage by people aged 75 years and over from the Local Authority population	Total number of bed days; crude and standardised number of bed days per 1,000 resident population aged 75 years or older
<b>Hospital financial costs</b>		
<i>Indicator reference</i>	<i>Indicator title</i>	<i>Data presented</i>
CGA8	Hospital financial costs of A&E attendances by people aged 75 years and over from the Local Authority population	Total financial cost of A&E attendances; crude and standardised rates per 1,000 resident population aged 75 years or older
CGA9	Hospital financial costs of outpatient attendances by people aged 75 years and over from the Local Authority population	Total financial cost of outpatient attendances; crude and standardised rates per 1,000 resident population aged 75 years or older
CGA10	Hospital financial costs of emergency admissions for people aged 75 years and over from the Local Authority population	Total financial cost of emergency (non-elective) hospital admissions; crude and standardised rates per 1,000 resident population aged 75 years or older
CGA11	Hospital financial costs of planned admissions for people aged 75 years and over from the Local Authority population	Total financial cost of planned (elective) hospital admissions; crude and standardised rates per 1,000 resident population aged 75 years or older
<b>Frailty within hospital</b>		

<i>Indicator reference</i>	<i>Indicator title</i>	<i>Data presented</i>
CGA12	Frailty levels of 75 year olds and over in the Local Authority population who are in-patients	Number and proportion of inpatients aged 75 years categorised as "low", "intermediate" or "high" risk of frailty based on hospital frailty risk score, with England comparators
CGA13	Frailty levels of 75 year olds and over in the Local Authority population who were admitted in an emergency	Number and proportion of emergency (non-elective) hospital admissions where patients were 75 years and older categorised as "low", "intermediate" or "high" risk of frailty based on hospital frailty risk score, with England comparators
CGA14	Frailty levels of 75 year olds and over in the Local Authority population who were admitted in a planned way	Number and proportion of planned (elective) hospital admissions where patients were 75 years and older categorised as "low", "intermediate" or "high" risk of frailty based on hospital frailty risk score, with England comparators
CGA15	In-hospital bed usage by people aged 75 years and over from the Local Authority population by frailty levels	Number of bed days for patients aged 75 years and over categorised as "low", "intermediate" or "high" risk of frailty based on hospital frailty risk score, with England comparators
<b><u>NHS Acute trust indicators</u></b>		
<b><i>Hospital activity</i></b>		
<i>Indicator reference</i>	<i>Indicator title</i>	<i>Data presented</i>
CGA16	A&E attendances at the Trust by patients aged 75 years and over by age and sex	Number and proportion of A&E attendances by people aged 75 years and older in each age category (75-79, 80-84, 85-89, 90+) by sex, with England comparators

CGA17	A&E attendances at the Trust by patients aged 75 years and over by deprivation	Proportion of A&E attendances where patients were aged 75 years and over in each deprivation category defined by national quintiles of the Index of Multiple Deprivation (IMD) of residential area, with England comparators
CGA18	Outpatient attendances at the Trust by patients aged 75 years and over by age and sex	Number and proportion of outpatient attendances by people aged 75 years and older in each age category (75-79, 80-84, 85-89, 90+) by sex, with England comparators
CGA19	Outpatient attendances at the Trust by patients aged 75 years and over by deprivation	Number and proportion of outpatient attendances where patients were aged 75 years and over in each deprivation category defined by national quintiles of the Index of Multiple Deprivation (IMD) of residential area, with England comparators
CGA20	Inpatients at the Trust aged 75 years and over by age and sex	Number and proportion of inpatients who were aged 75 years and older in each age category (75-79, 80-84, 85-89, 90+) by sex, with England comparators
CGA21	Inpatients at the Trust aged 75 years and over by deprivation	Number and proportion of inpatients patients aged 75 years and over in each deprivation category defined by national quintiles of the Index of Multiple Deprivation (IMD) of residential area, with England comparators
CGA22	Admissions at the Trust for people aged 75 years and over by age, sex and admission type (planned and emergency)	Number and proportion of planned (elective) and emergency (non-elective) admissions for people aged 75 years and older in each age category (75-79, 80-84, 85-89, 90+) by sex, with England comparators
CGA23	Admissions at the Trust for people aged 75 years and over by clinical speciality	Proportion of admissions by clinical specialty that patients aged 75 years and over are first treated under, with England comparators
CGA24	In-hospital bed usage at the Trust by people aged 75 years and over by age and sex	Number and proportion of bed days for people aged 75 years and older in each age category (75-79, 80-84, 85-89, 90+) by sex, with England comparators

CGA25	In-hospital bed usage at the Trust by people aged 75 years and over by deprivation	Number and proportion of bed days for patients aged 75 years and over in each deprivation category defined by national quintiles of the Index of Multiple Deprivation (IMD) of residential area, with England comparators
<b>Hospital financial costs</b>		
<i>Indicator reference</i>	<i>Indicator title</i>	<i>Data presented</i>
CGA26	Financial costs of A&E attendances at the Trust by people aged 75 years and over by age and sex	Financial cost of A&E attendances by people aged 75 years and older (per 1,000 A&E attendances) in each age category (75-79, 80-84, 85-89, 90+) by sex, with England comparators
CGA27	Financial costs of A&E attendances at the Trust by people aged 75 years and over by deprivation	Total and proportion of financial cost of A&E attendances where patients were aged 75 years and over in each deprivation category defined by national quintiles of the Index of Multiple Deprivation (IMD) of residential area, with England comparators
CGA28	Financial costs of outpatient attendances at the Trust by people aged 75 years and over by age and sex	Financial cost of outpatients attendances by people aged 75 years and older (per 1,000 outpatient attendances) in each age category (75-79, 80-84, 85-89, 90+) by sex, with England comparators
CGA29	Financial costs of outpatient attendances at the Trust by people aged 75 years and over by deprivation	Total and proportion of financial cost of outpatients attendances where patients were aged 75 years and over in each deprivation category defined by national quintiles of the Index of Multiple Deprivation (IMD) of residential area, with England comparators
CGA30	Financial costs of emergency admissions to the Trust for people aged 75 years and over by age and sex	Total financial cost of emergency (non-elective) hospital admissions for people aged 75 years and older (per 1,000 emergency admissions) in each age category (75-79, 80-84, 85-89, 90+) by sex, with England comparators

CGA31	Financial costs of emergency admissions to the Trust for people aged 75 years and over by deprivation	Total and proportion of financial cost of emergency (non-elective) hospital admissions where patients were aged 75 years and over in each deprivation category defined by national quintiles of the Index of Multiple Deprivation (IMD) of residential area, with England comparators
CGA32	Financial costs of planned admissions to the Trust for people aged 75 years and over by age and sex	Total financial cost of planned (elective) hospital admissions for people aged 75 years and older (per 1,000 planned admissions) in each age category (75-79, 80-84, 85-89, 90+) by sex, with England comparators
CGA33	Financial costs of planned admissions to the Trust by people aged 75 years and over by deprivation	Total and proportion of financial cost of planned (elective) hospital admissions where patients were aged 75 years and over in each deprivation category defined by national quintiles of the Index of Multiple Deprivation (IMD) of residential area, with England comparators
<b>Frailty within hospital</b>		
<i>Indicator reference</i>	<i>Indicator title</i>	<i>Data presented</i>
CGA34	Frailty levels of in-patients at the Trust who are aged 75 years and over	Number and proportion of inpatients aged 75 years and over categorised as "low", "intermediate" or "high" risk of frailty based on hospital frailty risk score, with England comparators
CGA35	Frailty levels of 75 year olds and over who were admitted to the Trust in an emergency	Number and proportion of emergency (non-elective) hospital admissions where patients were 75 years and older categorised as "low", "intermediate" or "high" risk of frailty based on hospital frailty risk score, with England comparators
CGA36	Frailty levels of 75 year olds and over who were admitted to the Trust in a planned way	Number and proportion of planned (elective) hospital admissions where patients were 75 years and older categorised as "low", "intermediate" or "high" risk of

		frailty based on hospital frailty risk score, with England comparators
CGA37	In-hospital bed usage within the Trust by people aged 75 years and over by frailty levels	Number of bed days for patients aged 75 years and over categorised as "low", "intermediate" or "high" risk of frailty based on hospital frailty risk score, with England comparators
CGA38	Frailty syndromes in admissions at the Trust for patients aged 75 years and over	Number and proportion of admissions where patients were aged 75 years and over identified with frailty syndromes, with England comparators
<b>Patient outcomes</b>		
<i>Indicator reference</i>	<i>Indicator title</i>	<i>Data presented</i>
CGA39	Mortality in patients aged 75 years and over following an emergency admission to the Trust	Mortality within 30 days of an emergency admission, crude and standardised rates for patients aged 75 years and over
CGA40	Emergency readmissions for patients at the Trust aged 75 years and over	Emergency readmission within 30 days of discharge from hospital, crude and standardised rates for patients aged 75 years and over
