Plain English summary

There is a growing emphasis on better use of resources in the NHS and, in particular, avoiding unnecessary spending on treatments or procedures that are of limited clinical effectiveness or cost-effectiveness but continue to take place. Stopping or withdrawing existing practices is not always easy, and this review aimed to explore the best ways of successfully changing/stopping or replacing them. We did this by reviewing literature and engaging with stakeholders to develop theories or ‘ideas’ and resources that would help professionals and managers to change or stop low-value practices.

Health and social care services need to consider the following points if reducing or removing procedures that have limited evidence for their effectiveness.

- Professionals need to be more aware of their day-to-day decision-making habits when ordering investigations and treatments through justifying their choices and receiving feedback on their performance relative to their colleagues.
- Systems that support professionals’ decisions, including electronic health records, need to make it harder for low-value treatments to be visible, and those treatments that are seen as more effective need to be presented first.
- Professional education about de-implementation of interventions combined with supportive individual feedback needs to be prioritised, starting during initial training and continuing throughout professional life.
- If there is professional uncertainty about the benefits of certain treatments, or the patient requests low-value investigations, the professional and patient should use ‘watchful waiting’ as an active consultation strategy, which supports patient and professional concerns. Here, the professional will not prescribe active intervention, but will agree with the patient to review symptoms for a time-limited period, after which further discussions about interventions will take place.
- The relationship between professionals and their patients is an important aspect of care, which can result in emotional difficulties if de-implementation is not managed in a clear and supportive way, thereby limiting its effectiveness.
- There is an onus on health-care organisations to give de-implementation equal consideration within short- and long-term policy strategy.
Criteria for inclusion in the Health Services and Delivery Research journal
Reports are published in Health Services and Delivery Research (HS&DR) if (1) they have resulted from work for the HS&DR programme, and (2) they are of a sufficiently high scientific quality as assessed by the reviewers and editors.
NIHR Journals Library Editor-in-Chief

Professor Ken Stein  Professor of Public Health, University of Exeter Medical School, UK

NIHR Journals Library Editors

Professor John Powell  Chair of HTA and EME Editorial Board and Editor-in-Chief of HTA and EME journals. Consultant Clinical Adviser, National Institute for Health and Care Excellence (NICE), UK, and Professor of Digital Health Care, Nuffield Department of Primary Care Health Sciences, University of Oxford, UK

Professor Andrée Le May  Chair of NIHR Journals Library Editorial Group (HS&DR, PGfAR, PHR journals) and Editor-in-Chief of HS&DR, PGfAR, PHR journals

Professor Matthias Beck  Professor of Management, Cork University Business School, Department of Management and Marketing, University College Cork, Ireland

Dr Tessa Crilly  Director, Crystal Blue Consulting Ltd, UK

Dr Eugenia Cronin  Senior Scientific Advisor, Wessex Institute, UK

Dr Peter Davidson  Consultant Advisor, Wessex Institute, University of Southampton, UK

Ms Tara Lamont  Senior Scientific Adviser (Evidence Use), Wessex Institute, University of Southampton, UK

Dr Catriona McDaid  Senior Research Fellow, York Trials Unit, Department of Health Sciences, University of York, UK

Professor William McGuire  Professor of Child Health, Hull York Medical School, University of York, UK

Professor Geoffrey Meads  Emeritus Professor of Wellbeing Research, University of Winchester, UK

Professor James Raftery  Professor of Health Technology Assessment, Wessex Institute, Faculty of Medicine, University of Southampton, UK

Dr Rob Riemsma  Reviews Manager, Kleijnen Systematic Reviews Ltd, UK

Professor Helen Roberts  Professor of Child Health Research, UCL Great Ormond Street Institute of Child Health, UK

Professor Jonathan Ross  Professor of Sexual Health and HIV, University Hospital Birmingham, UK

Professor Helen Snooks  Professor of Health Services Research, Institute of Life Science, College of Medicine, Swansea University, UK

Professor Ken Stein  Professor of Public Health, University of Exeter Medical School, UK

Professor Jim Thornton  Professor of Obstetrics and Gynaecology, Faculty of Medicine and Health Sciences, University of Nottingham, UK
